How to trade options on etrade

Photo Courtesy: [Prostock-Studio/iStock For the longest time ever, venturing into stock trading was the most dreadful financial step you could take. Getting brokers with reasonable fees (let alone free trading) was almost impossible. Fortunately, all this has changed, and you can find several commission-free trading avenues as you begin your stock trading journey. Stock trade newbies often lack enough profits to cover both their needs and the exorbitant commission fee that some brokerages charge. If you are a newbie, this article will explain how commission-free stock trading works, its pros and cons, and the best avenues for you. Photo Courtesy: [tdub303/iStock] So what exactly is commission-free stock trading, and how does it work? Put simply, it is a system in which stockbrokers help you with your trading activities without deducting their commission. As an investor, this serves as a welcome relief since the more investments you make, the more commission you will have to pay. Take, for instance; your commission fee is 6.5% every time you spend \$1000, you will lose \$65 in commission. Not to mention the annual fee you have to pay for your stocks or mutual funds. The cumulative loss can amount to a huge figure of money. However, you should know that commission-free trading is not entirely free. Your stocks may attract several other fees, such as expense ratios which are part of the costs you have to pay when trading mutual funds and exchange-traded funds. The most crucial step in any stock trade is fully understanding the fees you have to pay at each trading point. How Does Commission Free Trading Work? Photo Courtesy: [Erikona/iStock] Since Robinhood began its zero-commission trading in 2013, almost all other stock brokers followed the trend in a bid to keep their clients. Today, brokers such as E*TRADE, Ameritrade, and Schwab do not charge the traditional commission for their trades. While commission-free trading may seem like a costly venture on the broker's part, the truth is that brokers do not solely depend on commission to get their income. From margin loans to bank deposit account fees, there are plenty of other revenue avenues that stockbrokers bank on today. Types of Commission Free Trading Photo Courtesy: [rzoze19/iStock] Depending on your investment needs, there are a number of options you can choose from. Here are some of the common commission-free options that trading brokers offer today; ETFs (exchange-traded funds)ETNs (exchange-traded notes)Mutual funds Apart from the traditional stock trading brokers, there are several commission-free crypto trading options you can explore. Cryptocurrency brokers today are also embracing commission-free options for their clients. Pros and Cons of Commission Free Trading Photo Courtesy: [gorodenkoff/iStock] The greatest upside for commission-free trading is that it saves you lots of dollars annually. You can invest in plenty of stock trades at a go without having to pay commission. What's more, zero-commission trading allows you to experiment with multiple trading options before you settle on the stocks you want. On the flip side, some commission-free traders may sell your order flow, which in turn affects your overall profits. In this case, they sell the order flow to buyers who buy your stock, only to sell it back to you at a slightly inflated cost. However, you should know that the amount you lose will not be as high as the commission you would otherwise pay to brokers. There are plenty of other pros and cons of commission-free trading; however, any expert trader can attest that the pros of commission-free trading outweigh its cons. Where to Conduct Commission Free Trading Photo Courtesy: [H-Gall/iStock] So now that you know the basics of how zero-commission trade works, you are probably wondering where to conduct your trading for free. Here is a list of the best commission-free trading apps whose free commission trades will kick off your investments. 1. E*TRADE E*TRADE is arguably the best brokerage for newbies as they offer excellent investments (both for EFTs and mutual funds) at no commissions or transaction fees. What's more, E*TRADE boasts some of the lowest expense ratios in the investment world. It has plenty of other benefits, with its major downside being its far-from navigable website. Despite its website, it is excellent for all your investments. 2. Vanguard If you are thinking of more long-term investment options, you will want to consider Vanguard. Vanguard is well-tailored for long-term investors and offers low costs for these investments. They also have a website that you can easily navigate and offer some of the best trading tips and resources you can get. 3. TD Ameritrade Whether you want to get into hands-on trades or invest in mutual funds, TD Ameritrade has excellent trading platforms for you. They have lower expense ratios than most other brokerages, and their website and mobile apps are easy to use and very secure. Not to mention their professional and reliable customer service that is available 24/7. 4. Charles Schwab Schwab gains its popularity from its fractional shares of stock. This allows you to buy only the fraction of shares that you need rather than the full share of stock at the full price. This form of trading is particularly useful for new investors since they get a chance to invest what they can afford as they build up to an entire share. Schwab also offers low-cost options for all its investments. 5. Fidelity Another zero-commission platform you will want to consider is Fidelity. Here, you will find any investment options to suit your needs. Whether you are a beginner or a guru in the stock market, Fidelity has impressive deals for you. Their amazing low expense ratios and excellent (ever-present) customer care personnel will also make your trading experience worthwhile. However, before you make any investments, consider weighing all your options and finding brokers whose terms are favorable. Remember that some stocks have hidden fees that are not as apparent as you may wish. So before settling on any stocks, be sure that you have a clear picture of what you are signing up for. And once it is clear, trade away! MORE FROM ASKMONEY.COM To trade put options with E-trade it is necessary to have an approved margin account. Investors may sign up for margin accounts with E-trade at us.etrade.com. Investors are faced with deciding whether they prefer to buy and sell options and whether they want to write options, either covered or naked. Writing naked options involves additional approval because it entails a significant amount of risk. Options are a type of derivative. Calls bet that stocks are going to increase in price. Puts bet on decreases in price. An option is the right, but not the obligation, to buy or sell a set amount of stock for a predetermined amount of time at a predetermined price. Once investors have an approved margin account they may then log in to their accounts at us.etrade.com. To buy options, investors are required to research which company or index, strike price and expiration month they are interested in buying. Once they have this information they may enter an order to buy on the E-trade website. Options can change in value quickly. Investors are free to sell any options they have purchased at any time before they expire. Holding options for long periods of time is risky because options lose value through time value decay. Customers interested in writing options as an income strategy must either have the corresponding quantity of the underlying stocks in their account or be permitted to perform naked option writing. Option writers need to research which months and strike prices are available for the options they want to write. Nearby strike prices and months may offer better values than others. Covered call option writers may have their stocks called away from them. Naked option writers may be faced with buying stock or entering a short position in the open market in order to meet the obligations of their naked positions being exercised. E-trade contacts the writers of naked option positions quickly at the telephone number or address provided if options that they have written are exercised. E-trade may close positions that do not fulfill margin requirements quickly. Where E*TRADE falls shortFull details about E*TRADE's E*TRADE right for you? How we review: our methodology Where E*TRADE shinesSomething for everyone: Whether you are a beginner or an advanced trader, E*TRADE has a platform and a mobile app for you. The E*TRADE Web platform and the mobile app offer real-time quotes and market commentary, stock and exchange-traded fund screeners and a good deal of account management. More active traders can turn to the Power E*TRADE platform and app to get technical studies, drawing tools, customizable options chain views, trading ladders and other features for complex strategies.Tradable securities: E*TRADE offers a wide range of investment choices, from stock, bonds, ETFs and more than 4,300 no-transaction-fee mutual funds, to futures and advanced options strategies.Educational resources and support: The educational resources and support options on offer from E*TRADE are some of the best. You can watch webinars on diversification and technical analyses as well as on more-complex topics like options trading. There are online investing courses from Morningstar that cover a host of topics, and a thematic investing section covering how to invest in companies that align with your values.Where E*TRADE falls shortWebsite transparency: Our testers examined E*TRADE's website and were unable to easily find the company's required account minimum or guidance on how to close an account, both of which should be readily available.E*TRADE is best for:Retirement planning assistance.E*TRADE at a glanceNo base commission; \$0.65 per contract (volume discount available)Account fees (annual, transfer, closing, inactivity)No annual or inactivity fee. \$75 full transfer out fee; \$25 partialNumber of no-transaction-fee mutual funds• Stocks • Bonds • Mutual funds • ETFs • Options • FuturesInvestors have access to crypto-related products, but not cryptocurrencies themselves. Two platforms available for free to all customers: • E-Trade Web • Power E-TradeTwo apps: • E*TRADE mobile • Power E*TRADE Available on iOS and Android.Free and extensive, with over nine providers available at no cost.Customer support options (includes how easy it is to find key details on the website)Phone, email and chat support 24/7; 30 local branchesPersonalized advice from a real, human expertGet matched with a certified financial planner — because one size doesn't fit all when it comes to your money.LEARN ABOUT NERDWALLET PLUSMore details about E*TRADE's ratingsAccount minimum: 5 out of 5 starsE*TRADE's account minimum is \$0. This is typical of brokers these days — the vast majority of the brokers we review don't require a minimum to open or maintain an account. Keep in mind that some investments, such as mutual funds, may require a minimum initial investment.Stock trading costs: 5 out of 5 starsIn 2019, E*TRADE dropped its once-high \$6.95 trade commission to \$0 for online stock, options and ETF trades. Many other brokers did the same, and now free commissions are standard in the industry. You'll still pay a fee to trade certain securities, including futures, as well as a per-contract fee for options trades (see below).Options trades: 4 out of 5 starsOptions trades are commission-free, but they still carry a contract charge, which is \$0.65. E*TRADE offers a discounted fee of \$0.50 for active traders (defined as those who trade 30 or more times per quarter).Account fees: 4 out of 5 starsE*TRADE charges no annual or inactivity fee. There is a \$75 full transfer out fee; it's \$25 for a partial transfer. Most brokers impose a fee to transfer securities out of your account; that fee is often higher if you transfer out your full balance and close the account completely. E*TRADE waives the partial transfer fee if you have a remaining account balance of more than \$5,000.Number of no-transaction-fee mutual funds: 5 out of 5 starsE*TRADE offers more than 4,300 mutual funds that carry no transaction fee. Mutual funds not on the no-fee list will cost \$19.99 per transaction. E*TRADE's analysts regularly update a list of highlighted mutual funds called the All-Star Funds Report with the top no-load funds and ETFs offered.Tradable securities: 4 out of 5 starsE*TRADE allows investors to trade stocks, bonds, mutual funds, ETFs, options and futures. The company does not offer forex trading, cryptocurrency or allow investors to trade fractional shares of stocks. Fractional shares are becoming more common in the industry; they let investors purchase stock based on a dollar amount they select rather than the price of a whole share. This may be particularly advantageous for investors who are working with limited money, but want to build a highly diversified portfolio.Crypto availability: 2 out of 5 starsWhile E*TRADE investors can't buy or trade cryptocurrencies directly, the platform does provide access to crypto-related products, such as Bitcoin futures and cryptocurrency unit trusts.Trading platform: 5 out of 5 starsE*TRADE has two trading platforms — E*TRADE Web and Power E*TRADE. Both are free and available to all customers, with no trade activity or balance minimums.E*TRADE Web offers free streaming market data, free real-time quotes, live market commentary, analyst research stock screeners and more. From the dashboard, you can track your accounts, create watch lists, view market data and make trades, including complex options strategies.And for truly active traders, there's Power E*TRADE, the result of the company's acquisition of OptionsHouse several years ago. The web platform offers real-time data, more than 100 technical studies, over 30 drawing tools, streamlined trade tickets, customizable options chain views and trading ladders.Mobile app: 5 out of 5 starsOur star rating here is based on how iOS and Android users score the broker's mobile apps. E*TRADE has two free mobile apps, available for iOS and Android. The E*TRADE mobile app allows you to easily manage your account, place trades and get real-time quotes and news, including Bloomberg TV. It offers advanced mobile features like stock and ETF screeners, as well as multi-leg options trades. The E*TRADE app is available for Apple Watch as well.The Power E*TRADE app offers many capabilities on the go: Traders can access the customizable options chain, a selection of popular technical studies, charts, streaming quotes and news. The app can be used for trading complex strategies, including four-legged option spreads, and futures traders can enter futures orders directly from the futures ladder.Research and data: 4 out of 5 starsTo earn five stars in this category, brokers must offer at least 15 third-party research providers at no fee, as well as a strong selection of research tools. E*TRADE offers research from 9 providers at no fee, but the broker's analytical tools are user-friendly for both retirement investors and active traders, and they're available free of charge. In the past year, E*Trade has added Morgan Stanley to its lineup of research offerings, which already included Moody's, MarketEdge, and Morningstar.Customer support options: 4 out of 5 starsCustomer support is available 24/7 via phone, email and chat.E*TRADE also has strong in-person customer service, with 30 branches staffed by financial consultants.If you'd rather skip learning and cede investment decisions to the experts, E*TRADE's robo-advisor service, E*TRADE Core Portfolios, will manage your portfolio for you for an annual advisory fee of 0.30%. The minimum investment for that service is \$500. Robo-advisors are computer-based investment advisors who build and manage client investment portfolios.Is E*TRADE right for you?E*TRADE's investing tools, educational resources, large selection of no-transaction-fee mutual funds and innovative trading technology will suit all types of investors. Active traders will love the \$0 commissions, and beginners will easily get up to speed with the company's deep educational resources.How do we review brokers?NerdWallet's comprehensive review process evaluates and ranks the largest U.S. brokers by assets under management, along with emerging industry players. Our aim is to provide an independent assessment of providers to help arm you with information to make sound, informed judgements on which ones will best meet your needs. We adhere to strict guidelines for editorial integrity.We collect data directly from providers through detailed questionnaires, and conduct first-hand testing and observation through provider demonstrations. The questionnaire answers, combined with demonstrations, interviews of personnel at the providers and our specialists' hands-on research, fuel our proprietary assessment process that scores each provider's performance across more than 20 factors. The final output produces star ratings from poor (one star) to excellent (five stars). Ratings are rounded to the nearest half-star.
